

blu·stone™

An extensive selection of luxury freestanding bathtubs, shower bases & sinks are made from Blu Bathworks® signature eco-friendly stone material.

durable

Crafted from 80% quartzite, blu·stone™ is a highly durable material, which is high-pressure injection-molded, anti-microbial & non-porous. Low maintenance & repairable, blu·stone™ bathware is stain & scratch resistant.

colors + texture

Visually luminous and highly tactile, blu·stone™ is homogeneous in nature & available in a range of colors and choice of matte or gloss finishes. Personalize further with an optional exterior embossed pattern - which can be custom designed.

sustainable

blu·stone™ material composition provides superior water temperature retention, and given its low-energy production process & limited production wastage due to its recyclable nature, blu·stone™ fixtures are an environmentally friendly choice.

design flexibility

The blu·stone™ collection includes a range of luxury bathtubs, sinks & shower bases - all available in a choice of sizes and shapes. blu·stone™ bathtubs range from compact condo-sized options suitable for alcove installation to luxury freestanding models. blu·stone™ is the ideal material for creating custom design solutions to support project specifications. Just let us know your requirements.

colors & finishes

Visually luminous, blu-stone™ bathware is offered in a white matte finish as standard, which – unlike gelcoat alternatives – is how blu-stone™ emerges from the mold. Many blu-stone™ products are also available in a gloss finish, which is achieved by delicately polishing the matte product.

A selection of blu-stone™ bathtubs & sinks are also available in a range of vibrant, modern colors including lime, concrete & black, all complete with matching blu-stone™ waste cover. Homogenous in nature, the color is consistent throughout and stain & scratch resistant for easy maintenance.

Uniquely, blu-stone™ bathware is also available with an optional carved embossed pattern, achieved through a hand-crafted process. In addition to creating texture, the embossed pattern can be custom designed to create a highly individualized statement piece.

blu-stone™ is a live finish, which may exhibit variations in color, shade and brightness over time to better reflect the natural stone material, while the optional embossed carving may exhibit a faint shadow or grey effect. We believe this process further personalizes the piece and will make any interior space a work of art.
